<b>6</b> 252x80h56 mm

### Technical data

#### Housing

Material:

Screw material:

Protection degree:

Conduit entries:

Mounting of the devices:

Utilization requirements:

Self-extinguishing shock-proof polycarbonate with double insulation, UV resistant fibreglass reinforced, with increased shock resistance stainless steel

IP67 acc. to IEC 60529

IP69K acc. to ISO 20653 with cable gland having equal or higher protection degree

Housing with 1 hole:

- 2 upper and lower inputs with knock out M20 - 1/2 NPT
- 2 side inputs with knock out M20 - 1/2 NPT - M25
- 2 base inputs with knock out M16

Housings with 2-3-4-6 holes:

- 4 side inputs with knock out M20 - 1/2 NPT - M25
- 2 base inputs with knock out M20

Suitable for the installation of control and signalling devices Ø 22 mm

Ø 22 mm hole compliant with EN 60947-5-1 see page 124

### Main features

- Protection degrees IP67 and IP69K
- Stainless steel captive screws
- 4 lateral cable inlets
- Comes with caps for screws

### Markings and quality marks:

EAC approval: RU C-IT ДМ94.В.01024

### General data

Ambient temperature: -40°C ... +80°C

Tightening torque of the cover screws: 1 ... 1.4 Nm

### In conformity with standards:

IEC 60947-1, IEC 60947-5-1, IEC 60204-1, EN 574, EN 60947-1, EN 60947-5-1, EN 60204-1, UL 508, CSA 22-2 no.14.

### In conformity with the requirements of:

Low Voltage Directive 2006/95/EC

Machinery Directive 2006/42/EC

EMC Directive 2004/108/EC.

### General data

#### Protection degrees IP67 and IP69K

**IP69K**  
**IP67**

These devices are designed to be used in the toughest environmental conditions and they pass the IP67 immersion test acc. to IEC 60529. They can therefore be used in all environments where the maximum protection

of the housing is required. Special measures also allow devices to be used even in machines which are subjected to washing with high pressure warm water jets. In fact these devices pass the IP69K test according to ISO 20653, using jets of water to 100 atmospheres at a temperature of 80°C.

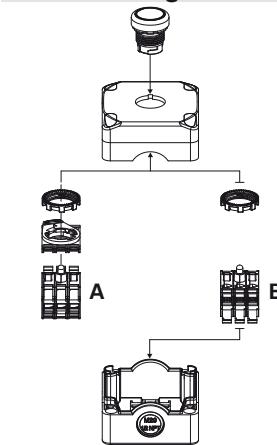

#### Fixing of EROUND housing

The new housings of the EROUND line by Pizzato Elettrica have 4 additional holes on the cover. The holes enable wall fixing from the outside by means of through insertion of the screws, without the need to open the cover to access the holes.

The wall fixing screws and the ones for closing the housing cover can be sealed with 4 caps (supplied with the housing). The caps not only give the housing a more pleasant look, but they also prevent the accumulation of dirt inside the recesses of the screws besides making tampering more difficult.

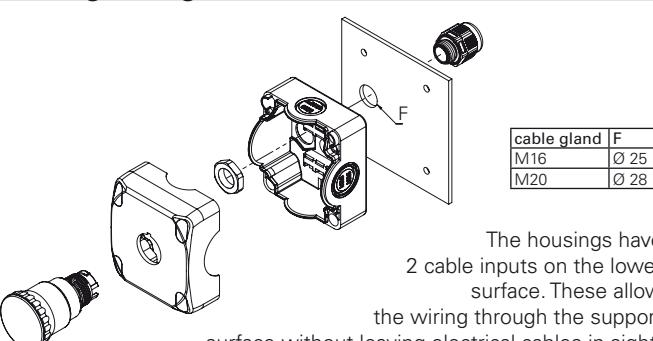

The external fixing of the housing is particularly suitable for already wired housings, because the whole installation is simplified: you can simply fix the housing and connect the connector that, thanks to the presence of cable inputs on the four sides of the housing, can be orientated in the preferred direction.

#### One housing, two solutions

The same housing can fit up to 3 contact blocks/LED units (E2 CP, E2 LP) for panel mounting by means of a mounting adapter (A) or up to 3 contact blocks/LED units (E2 CF, E2 LF) for attachment directly on the bottom of the housing (B).

#### Wiring through the lower surface

The housings have 2 cable inputs on the lower surface. These allow the wiring through the support surface without leaving electrical cables in sight.

## Selection table for housings

Cover colour	Article	Hole Ø 22 mm
<input checked="" type="checkbox"/> yellow RAL 1003	ES 31001	1
